

SUNSTREAM

HELIX-P

**FIRST BOAT
IN THE WATER
WINS.**

SUNSTREAM HELPS YOU ENJOY YOUR BOAT MORE.

Boating is our passion and, like you, we envisioned a future that minimized the hassles and frustrations of getting your boat in and out of water, accessing the hull and covering the boat. For over 25 years, we've been leading the industry by elevating boating experiences all over the globe. Our award winning engineering and design continue to push the boundaries of what's possible by producing many of the world's first freestanding hydraulic boat lifts and automatic cover systems. You're invited to the future of boating.

Boat more, boat easier, boat better.

HELIX-P

HELIX-P

Performance That's Out of Sight

Sunstream has completely reimagined what a piling lift should be, by combining unprecedented hydraulic speed with an attractive hidden structure to create a lift that delivers easier boarding, increased reliability and safety, reduced noise and launching / lifting speeds as fast as 15 seconds. Helix-P is an invitation to go boating more often and have more fun!

Well designed to lift boats and drop jaws.

- 1 High Speed Hydraulic Motor
- 2 Stainless Steel Components
- 3 Stainless Ball Bearings

- 4 Easy adjusting cables
- 5 No motor on far side
- 6 Super stiff Catwalks standard

- 7 T-Top Cross Beam Tube
- 8 Guide-on options
- 9 SuperBunks™

PREMIUM FRAME

The Helix-P cradle locks in the "up" position to prevent swinging in the wind, reducing cable fatigue and extending cable life. Since it does not use independent port and starboard motors, releveling is greatly reduced. Lubricated stainless steel ball bearings increase speed while decreasing noise, while also reducing friction on the torque tube. Sunstream's unique rubber capped aluminum Superbunks™ provide durable yet soft cushioning to protect and support your hull. Helix is constructed of a thick marine grade aluminum structure to provide superior stiffness; and stainless steel hardware to prevent corrosion. The frame has non-slip striping on top for safety and appearance, and optional Storm Surge Inserts can be added quickly to raise your boat an additional 24".

HIGH PERFORMANCE HYDRAULICS

The unique Sunstream Power System (SPS™) enables users to select a hydraulic DC powerpack of 6hp or 12hp, which can create a system that is approximately 12x faster than typical piling lift speeds. SPS also provides a backup power source for enhanced reliability with sealed non-maintenance batteries; and single powerpacks can be shared among multiple Sunstream lifts or SwiftShield Automatic Boat Cover Systems to provide a cost-effective, less cluttered power solution. Unlike other piling lifts, Helix can be plugged in to an extension cord, with only 6A of 110V power (3a of 220V for international customers); and does not require 220V power mounted on the lift or routed underwater, for added safety and reliability.

OPEN VIEWS & EASIER BOARDING

Helix-P was designed with a minimalist aesthetic to showcase your trophy. There are no visible motors, electrical work, or gearboxes; and pilings are low and there are no side beams, which opens up your view. Because of its unique configuration, Helix-P can be installed with as little as 5 inches gap between your dock and boat, which means easier and safer loading and unloading.

TECHNOLOGY

The Helix-P advanced control system adds to the excitement and fun of boating. The smartphone app enables the lift to be controlled from a smartphone so your remote is always with you. This high-speed lift accelerates and decelerates multimotor powerpacks for smooth operation and a double click feature brings to the boat to predetermined stops so it's customized to your dock. A reliable encoder revolution counter inside the motor eliminates the need for vulnerable and unreliable limit switches, and enables multiple intermediate stopping points for the ultimate in user control.

SWIFTSHIELD

Sunstream's SwiftShield automatic boat cover system helps you to use your boat more and protects your investment. Say farewell to the frustration that comes with traditional boat covers and hello to boating anytime you want. Be on the water in just 30 seconds with the push of a remote.

A vertical grey power pack with the Sunstream logo is mounted on a wooden dock. The background shows a body of water and parts of a boat's structure.

SUNSTREAM

SPS™

SUNSTREAM POWER SYSTEM

The unique Sunstream Power System (SPS™) enables users to select a hydraulic DC powerpack of 6hp or 12hp, which can create a system that is approximately 12x faster than typical piling lift speeds. Single power pedestals can be shared among multiple Sunstream lifts or SwiftShield Automatic Boat Cover Systems to provide a cost-effective, less cluttered power solution for your dock. SPS uses only 6A / 110v power which means that installation and wiring is easy and affordable.

MODELS & SPECIFICATIONS

HELIX-P

	MEDIUM	LARGE	X-LARGE			
Model	HP8000	HP12000	HP18000	HP18000-W	HP24000	HP24000-W
