

SUNSTREAM

SWIFTSHIELD

Automatic Boat Cover System

**FIRST BOAT
IN THE WATER
WINS.**

SWIFTSHIELD

Boat more, hassle less.

Sunstream's SwiftShield automatic boat cover system helps you to use your boat more and keeps your boat looking new longer. Say farewell to the frustration that comes with traditional boat covers and hello to boating anytime you want. Cover or uncover in 30 seconds with the push of a remote.

The first boat cover you'll love to use.

SMOOTH HYDRAULICS

No more hassle or muscling your cover to snap it on. When it's time to cover your boat after a full day on the water, the strength and precision of the hydraulics guide the cover on and hold it tightly so nothing gets in. Smooth, strong and secure.

SUPERIOR COVERAGE

The only thing more important than convenience is protection, and that starts with a custom fit cover. Your boat is measured digitally for the optimal fit to secure your boat (top, sides and rear) from the elements and open aft venting enables quick drying. When you're on the water, the cover is stored on the roller so you don't have to stow it. Covering has never been easier with this mechanically assisted system that helps you cover your boat with far less handling.

DURABLE CONSTRUCTION

Sunstream designs for the long term with marine-grade aluminum and stainless steel hardware so the SwiftShield will stay strong in fresh or salt water. Our reliable hydraulic design ensures years of use while water-soluble fluid helps to protect the environment.

MULTIPLE CONFIGURATIONS

We think the Sunstream Swiftshield automatic boat cover system is a gamechanger which is why we wanted to make it available to as many boaters as possible. The SwiftShield pairs perfectly with the SunLift X, SunLift Legacy, FloatLift, and Helix-P. Additionally, we offer configurations for other types of pile lifts, elevator lifts and swing arm airlifts.

SWIFTSHIELD **AMS**

for Sunstream SunLift X and SunLift Legacy

SWIFTSHIELD **AMP**
for Helix-P and most other piling lifts

SWIFTSHIELD **AMU**
for Sunstream FloatLift,
Swing Arm Air Lifts,
and Elevator Lifts

SWIFTSHIELD FEATURES

1 Aft Venting

Your boat dries quickly, preventing molding with great ventilation in the rear.

2 Strong Spring Roller and Cover Storage

A powerful torsion spring keeps the cover super tight. Cover rolling system means that bulky covers do not need to be stored on board, which maximizes use of limited storage on boat.

3 Adjustable Hydraulics

Arm starting and ending position is easily adjusted.

4 Hidden Cylinder

Retracted cylinder keeps the shaft clean.

5 Cover Lanyards

Lanyards connect to optional bow sprit, to bottom, or to dock. Lanyards keep cover from rolling up in off position.

6 Digital Custom Cover

Covers are digitally measured and custom designed to reduce stress points and provide optimal fit for boat features and then digitally precision cut.

7 Adjustable Arm

SwiftShield mechanism is adjustable to fit a wide range of boats.

Remote Control

SwiftShield is remote-controlled via a handheld key fob.

Solar or AC charged Hydraulic Powerpack

12V Hydraulic power unit, remote control and battery housed in a decorative and durable fiberglass box.

Integrated Cover/Lift Operation

For SunLift / SunLift SLX owners

The Swiftshield AMS shares the same powerpack as the SunLift / SunLift SLX and automatically switches from 'Cover mode' to 'Lift mode.' The remote offers seamless experience from uncovering the boat to lowering it with one press of the button. This also prevents accidentally lowering the boat through the roller. When you're done, just press the up button to raise the boat and cover the boat.

ONE-FINGER ACCESS

Protect your boat with full coverage and access with a touch of a button. Enjoy your boat more and hassle less.

FLEXIBLE APPLICATION

By design, the SwiftShield various models are built to work with many different boat lifts, boat sizes and styles. Chances are, we have a configuration that will fit your boat.
